

# The Altrad global safety principles

---

## Leadership

- › Our commitment to excellence in health, safety and welfare will be delivered with passion, drive and enthusiasm, ensuring our vision for 'safe operations every day' becomes a reality

## Ownership

- › We will make safety personal and will empower all our employees to be accountable and responsible for their own safety and that of their peers

## Risk Management

- › We will continually assess the risk posed to our employees and ensure measures are in place to eliminate, minimize and mitigate those risks

## Standards

- › We will champion and adopt best practice within all our operations and constantly challenge our health and safety performance

## Learning

- › We will develop organizational learning for health and safety with a focus on the actions that address either our understanding or mitigation of risk

## Communication

- › We will communicate and promote our safety values and above all listen to safety concerns our employees may have

## How the Principles relate to HSE management in Altrad
